

## Big Picture documentation in JIRA

This documents records the steps taken to document the big picture part of the final assessment in JIRA

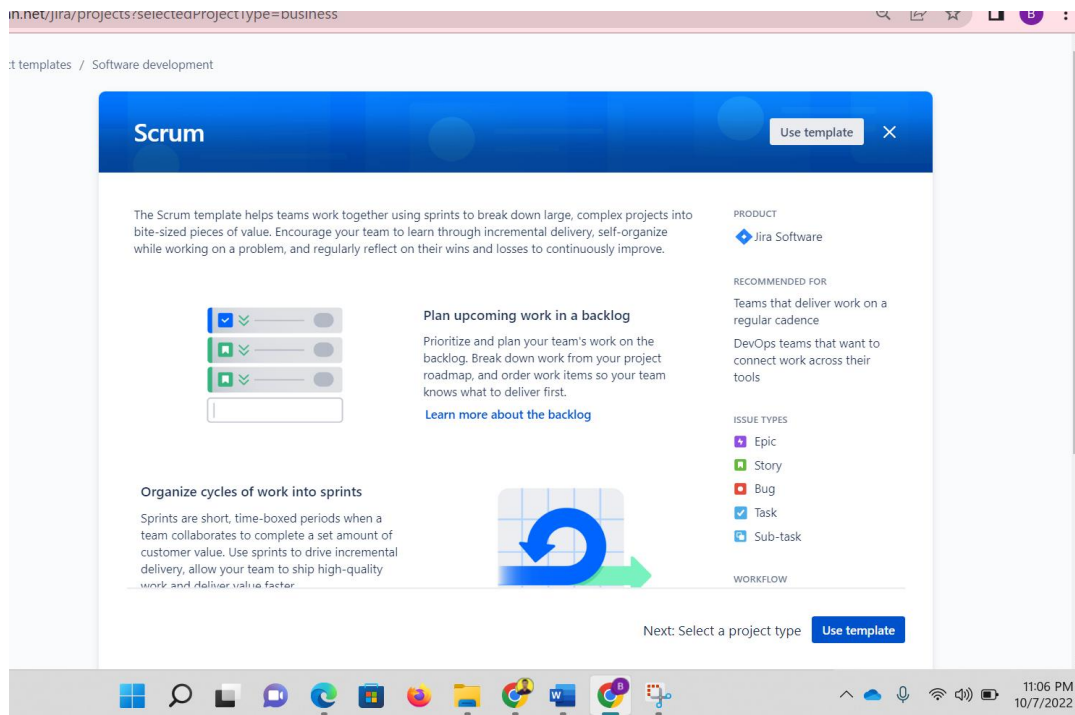

### i) Creating a new project

### b) Selecting Scrum as the agile framework used

## c) Selecting use template of scrum

## d) Selecting company managed project

and practices in a self-contained space. Mix and match agile features to support your team as you grow in size and complexity.

projects in a standard way. Encourage and promote organizational best practices and processes through a shared configuration.

### Simplified configuration

Get up and running quickly, with simplified configuration.

- Anyone on your team can set up and maintain
- Settings do not impact other projects
- Easy setup for issue types and custom fields
- Simple configuration for multiple workflows
- Access level permissions

Essential features

Select a team-managed project

### Expert configuration

Benefit from complete control with expert configuration, customization and flexibility.

- Set up and maintained by your Jira admins
- Standardized configuration shared across projects
- Complete control over issue types and custom fields
- Customizable workflows, statuses and issue transitions
- Detailed permission schemes

Advanced features

Select a company-managed project

The last project you created was a company-managed project

## e) Adding the project name

### Add project details

You can change these details anytime in your project settings.

Name

Big Picture and Automation Testing

Key 

BPAT

☐ Share settings with an existing project

☐ **Connect repositories, documents, and more**  
Sync your team's work from other tools with this project for better visibility, access, and automation.

Template

Change template

**Scrum**

Sprint toward your project goals with a board, backlog, and roadmap.

Type

Change type

**Company-managed**

Work with other teams across many projects in a standard way.
